

Supplementary Table 3: Gender-Affirming Surgeries Sought by Participants

Patients were presented with a list of gender-affirming surgical procedures and asked to select which they were interested in pursuing. The procedures listed below are a direct reproduction of the diction and punctuation used in the patient-facing survey tool. Selection of multiple items was permitted.

	DUKE PATIENTS	NATIONAL PATIENTS
GENDER-AFFIRMING SURGICAL PROCEDURE	PERCENT	PERCENT
Breast augmentation	20%	3%
Chest wall reconstruction/"top surgery"/mastectomy	34%	8%
Facial feminization surgery	29%	3%
Hysterectomy	25%	2%
Laryngoplasty (insertion of prosthetic Adam's apple)	4%	0%
Laryngoplasty (removal of Adam's apple or "trach shave")	15%	1%
Metoidioplasty	10%	2%
Orchiectomy	23%	0%
Phalloplasty	17%	0%
Vaginal closure	9%	1%
Vaginoplasty	35%	4%
